

! WARNING

Ball can unexpectedly fly in any direction. Practice with wiffle ball until you can control direction reliably. Use golf ball away from people and breakables.

The First Swing Instruction on how to use the Slinger

Congratulations!

You've purchased the Slinger! The best golf swing improvement tool available! Crafted with precision, and made of the finest materials, it's built to last. Portability allows you to take it anywhere you go. Indoor/outdoor capabilities lets you perfect your swing year round. Precise visual feedback of the balls trajectory will guide you to a great and lasting swing.

Visit www.slingergolf.com for swing drills, videos, round-the-clock assistance from top teaching professionals, and much more.

From everyone at SlingerGolf...Thank You!

The Slinger

Close up view of the Slinger

A) Retainer

This holds the ball.

B) Ball

For indoors, use lightweight plastic balls. Use Almost Golf Balls or real golf balls outdoors only when you are proficient with the Slinger.

C) Clip

This prevents the ball from falling out of the retainer during a correct swing. It is removable and interchangeable with our Velcro target system clip. (See instructional video on our website)

D) Yellow Arrow

Used at address to aim down the target line at the intended target.

E) Red Arrow

Used as a reference point for our Swing Drill videos.

F) Club Head

Made of high-grade polished stainless steel.

Your First Swing

1. The Slinger is designed to make an air swing that never contacts the ground. Do not attempt to hit a ball off the ground with the Slinger.
2. A fast, jerky backswing will cause the ball to fall out of the retainer. Use a slow, smooth, backswing to keep the ball in the retainer to develop a smooth, tempoed backswing.
3. Hold the Slinger as you would a 6-iron as if you were about to hit a real ball. Do not let the club head lift up at address. (See Figure 1)
4. As the club head reaches waist high in your backswing, the shaft should be parallel to the ground. The red arrow on the toe of the club head should point straight up, or slightly angled toward the target line. See the Toe-up Swing Drill on our website. (See also, Figure 2)
5. Your left arm should line up with the shaft at the perceived point of impact with the ball. Note: hands positioned too far in front of, or behind, the club head will cause incorrect ball trajectory. (See Figure 3)
6. For best results smooth, easy swings are recommended with the Slinger. Visit our site to view our expanding video library of Swing Drills to improve and maintain your golf swing.

Setting Up a Practice Area

The Slinger is a precision swing improvement tool. Using certain protocols when setting up your Slinger practice area will help you to Practice Smart and Improve!

1. Find wall space approximately 8 x 8 feet. Check ceiling clearance for Slinger.
Place a target or apply masking tape on the wall in the center of the wall area.
2. Outdoors insert a stick, rod or broken club in the ground as a target.
3. Place a golf club, masking tape or an InsideMove as a target line on the floor approximately 8-20 feet from wall.
4. Place a ball on the target line as a visual reference point only. DO NOT hit ball. (See Figure 4)
5. Place a golf club, masking tape or a second InsideMove parallel to, and approximately 16" inches from, the target line to create a stance line. (See Figure 4)
6. That's It! Your practice area is set up. Start learning a Great swing with your Slinger. Remember...Practice Smart to Improve!

The Slinger is a precision swing improvement tool. It is highly recommended to use certain protocols when setting up your Slinger practice area. Without these setup protocols, which provide for a repeatable arrangement of the practice area, the full potential of the Slinger as a swing improvement tool may not be attained.

We suggest that a practice area be used indoors or outdoors. It's simple to setup and can be setup anywhere you go with the Slinger. The Slinger can also be used anywhere including a park, backyard, a driving range as well as inside the home, office or hotel room when on the road.

Ball Flight Analysis

You've taken your first swing with your new Slinger. Every swing with the Slinger gives you precise visual feedback of the ball's trajectory telling you what's happening with your golf swing....good or bad. The wall area below gives basic analysis of the ball's point of impact. For in depth analysis including videos and comments by Top Teaching Pros visit the SlingerGolf website at: www.slingergolf.com

To better improve your swing and the performance of The Slinger, please refer to our Ball Flight Matrix.

Go to our website and click on the square where your ball hits and learn what is happening with your swing, and if needed how to fix your swing.

The InsideMove

Incorrect Swing

Correct Swing

The InsideMove is a another great swing improvement tool by SlingerGolf. Use it at the driving range, golf course, or with the Slinger in your practice area as a portable target line and swing path guide.

Practice Smart to Improve!
